

INFLATION RISES

Consumers paid 2.0 per cent more in September 2016 than they did a year ago for the basket of goods and services included in the Consumer Price Index (CPI). The level of inflation increased 0.4 percentage points from the 1.6 per cent measured in August 2016.

Between August 2016 and September 2016, the average cost of goods and services in the CPI increased by 1.0 per cent. The all-items index rose to 102.7 in August. This means that the basket of goods and services that cost \$100.00 in April 2015 now costs \$102.70.

YEAR-TO-YEAR ANALYSIS

The Education, Recreation, Entertainment & Reading sector was the largest contributor to the year-over-year change, increasing 4.3 per cent. The leading contributors to the increase were local and overseas school tuition.

In addition, the Health & Personal Care sector and the Food Sector also impacted significantly the year-over-year increase. These sectors rose 3.7 and 1.9 per cent, respectively.

**Inflation
Rate
2.0%**

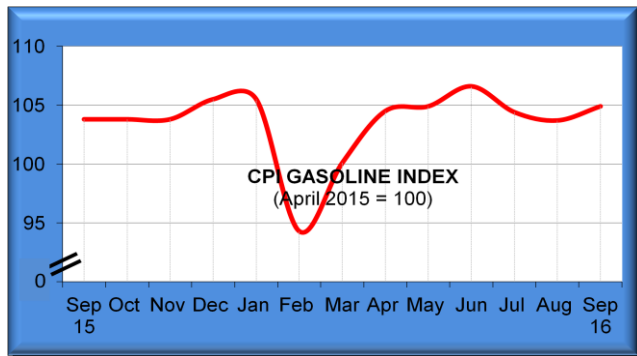

The compilation of the CPI involves the processing of several thousand price quotations. The Department of Statistics wishes to acknowledge the cooperation of the business community in supplying the required price data.

SUMMARY STATISTICS					
Period	Monthly		Period	Quarterly

Sep	102.7	+2.0			

MONTH-TO-MONTH ANALYSIS

Transport & Foreign Travel

The Transport & Foreign Travel sector bounced back from a 4.3 per cent decrease in August, increasing 4.5 per cent in September. The average cost of air fares and overseas accommodations increased 13.6 per cent and 13.2 percent, respectively.

Fuel & Power

The Fuel & Power sector rose 6.0 per cent in September as the fuel adjustment rate increased 20 per cent.

Education, Recreation, Entertainment & Reading

The Education, Recreation, Entertainment & Reading sector was increased 1.1 per cent in September. The average cost of local and overseas school tuition increased 3.9 per cent and 2.7 per cent, respectively.

Food

The Food sector inched up 0.1 per cent for the second consecutive month. Key contributors to the increase were onions (4.4 per cent), oranges (4.2 per cent) and fresh tenderloin (2.7 per cent).

Household Goods, Services & Supplies

The Household Goods, Services & Supplies sector increased 0.1 per cent in September. The average cost of child care fees rose 1.6 per cent.

Tobacco & Liquor

The average cost of wines rose 0.2 per cent in September, which led to a 0.1 increase in the Tobacco & Liquor sector.

Rent

The Rent sector was unchanged in September, following an increase of 0.1 per cent in August.

Clothing & Footwear

The Clothing & Footwear sector was static in September.

Health & Personal Care

There was no movement in the Health & Personal Care sector for the third consecutive month.

COMPUTING PRICE INCREASES

The Department of Statistics receives calls daily requesting the rate of inflation over specific periods of time. The following calculations are provided to guide users as to how to compute rates of price increases. The monthly index numbers can be obtained from our website www.gov.bm.

A) Month-to-Month Price Change

The price change between November and October, 2015 is calculated as follows:

$$= \frac{\text{Nov 15 index} - \text{Oct 15 index}}{\text{Oct 15 index}} \times 100$$

$$= \frac{100.5 - 100.6}{100.6} \times 100$$

$$= -0.1\%$$

B) Year-to-Year Price Change

The price change between December 2015 and December, 2014 is calculated as follows:

$$= \frac{\text{Dec 15 index} - \text{Dec 14 index}}{\text{Dec 14 index}} \times 100$$

$$= \frac{100.5 - 98.7}{98.7} \times 100$$

$$= 1.8\%$$

C) Particular Period Price Change

The price change between April 2014 and January, 2016 is calculated as follows:

$$= \frac{\text{Jan 16 index} - \text{Apr 14 index}}{\text{Apr 14 index}} \times 100$$

$$= \frac{100.3 - 98.3}{98.3} \times 100$$

$$= 2.0\%$$

BERMUDA CONSUMER PRICE INDEX

WHAT IS THE CONSUMER PRICE INDEX?

The Consumer Price Index (CPI) is a statistical tool used for measuring changes in the general level of prices of consumer goods and services purchased by private households.

The index measures price movements of a given quality and quantity of goods and services. The mix of these consumer goods and services comprising the index, are figuratively thought of as a “shopping basket.” In constructing this “shopping basket”, the selected goods and services are organized first by commodity type. They are then divided into sub-components and assigned to a major expenditure group. The Bermuda CPI is structured into nine expenditure groups or sectors:

- Food
- Rent
- Clothing & Footwear
- Tobacco & Liquor
- Fuel & Power
- Transport & Foreign Travel
- Household Goods, Services & Supplies
- Education, Recreation, Entertainment & Reading
- Health & Personal Care

CONCEPTS AND DEFINITIONS

Base Period

The time period which is used as a reference point for measuring the price change of goods and services. The base period for the Bermuda CPI is April 2015.

Price Index Number

A single figure that shows how a set of prices has changed over a specified period of time. An index number on its own means nothing. It must be compared with an index number from another period to have meaning. For example, a comparison of the index number 97.2 for January 2014 with 100.4 for January 2016, reveals that prices have increased by 3.3 percent.

Laspeyres Equation

The CPI is computed using this statistical equation. This formula calculates the total amount of money a household needs today to purchase the same basket of goods and services that it bought in the base period, April 2015.

WEIGHTED AVERAGE

A mathematical formula that takes into account the relative importance of an item's price change compared to the overall change in the sector or CPI.

Inflation

Inflation is the process of rising prices, resulting in diminishing purchasing power of a given sum of money.

Cost of Living Index

Many individuals refer to the CPI as a cost-of-living index. The CPI is an index of pure price change only. A cost-of-living index reflects the changes in buying or consumption patterns that consumers would ordinarily make to adjust to any change in the price of a good or service.

A COMPARISON OF RATES OF INFLATION (%) Selected Countries & Bermuda

	2012	2013	2014	2015	Sep 16
Bermuda	2.4	1.8	2.0	1.5	+2.0
United States¹	1.7	1.5	0.8	0.7	+1.5
Canada²	1.5	0.9	2.0	1.1	+1.3
United Kingdom³	3.2	3.0	2.4	1.1	+2.0
